## LIST OF BOOKS INDEXED

The list, arranged in one alphabet, includes both works by various authors and works by individual authors. As a rule, only a main entry is given for each work included in this list but, in some cases of questionable entry, title or editor references are made. For a collection of essays published in honor of a particular individual, a reference is made from the name of the person honored to the main entry, which is usually a title entry. Generally, only American publishers are given. The English publisher is given when the book in question is obtainable only in an English edition.
